# WHEN I GROW UP, I DREAM TO BECOME...

Our single bed is the foundation upon which you can start building any dream. Made from quality solid beech wood from Slovenia, it is the heart of WOOTHY furniture collection.

Single bed is the basic component upon which all further bed configurations can be built. It is possible to upgrade it with safety rails in front and back of the bed. Rails can be removed when the child is older and he doesn't need them anymore.

# EVERY GREAT DREAM BEGINS WITH A DREAMER

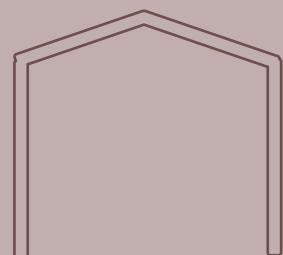

Who as a kid has not dreamt about a little house or a hiding place entirely their own? Our canopy bed creates a special atmosphere that allows kids to creatively use it as secret place to play in, daydream and plan their next adventure.

Canopy can be removed as your kid grows up or it can be used separately as a little house to play in. The fabric is simply removed and washable.
